"SAY IT WITH PLANTS AND FLOWERS"

W. A. MANDA, Inc.

SOUTH ORANGE, N. J.

INVITATION

If you are interested in plants and wish to see what is conceded to be the finest collection of plants in the country take a train on the Lackawanna Railroad to South Orange, where our establishment is located right at the station, which is only fourteen miles from the City of New York. Or motor through the new Holland Tunnel and over the beautiful Jersey roads to South Orange and visit our establishment close to the station.

Here we can show you 60,000 plants of CACTI and SUCCULENTS in over 1,000 varieties. We can show you a CACTUS GARDEN under glass—the most unique CACTUS and SUCCULENT GARDEN in the world—where over 1,000 varieties of these beautiful plants in all sizes and shapes are planted and arranged as they grow in their native home.

Besides these, we can show you a fine collection of LIVING VASE PLANTS or BROMELIADS, all sorts of FANCY FOLIAGE and FLOWERING PLANTS, FERNS of all sizes, and so on. Old-fashioned HARDY HERBACEOUS PLANTS as well as beautiful ROCK PLANTS for Rock Gardens, including suitable Rocks.

The writer's fifty-eight years experience is at your service and costs you nothing.

CACTUS GARDENS

These beautiful combinations are one of the originations of W. A. MANDA. It was back in 1920 when the first Gardens were sent out, planted in ordinary pans or square seed pans, and were gradually improved by using numerous varieties, sizes, shapes and colors of not only domestic bowls and dishes, but importations from Japan, China and several European countries. In sizes they vary from 1½ inches in diameter to window boxes 2½ feet long and various shaped containers from 4 inches to 2 feet in diameter.

The best selection of the over 1,000 varieties which we are growing, are used, in sizes of plants not bigger than a quarter of an inch to large specimens nearly a foot across and a foot or two high. These are planted with volcanic rock to which these plants like to attach their roots and which gives the garden also a natural rocky effect, as it is aimed to have each of these gardens represent a miniature section as the plants grow naturally.

These Gardens should not be confounded with lots of poor imitations, where just so many plants are jammed together, having a sameness of effect, and without being previously established, naturally do not last.

The prices of these beautiful gardens are from \$1.00 up, according to the size and quality of the dish as well as the choice of the plants used.

We have also choice fancy pots from 1 inch up to 1 foot across, planted with individual specimens of CACTI of select beauty. These individual specimens range in price from \$1.00 up, according to their size and rarity.

CACTI and SUCCULENTS are the easiest to cultivate—all they require is plenty of light, air and sun and they will stand any temperature from 35 to 135 degrees. They should not be over-watered—by giving them a thorough watering or submersion of the part containing the soil and rock once a week, they receive all the care they need.

They are the hardiest and most useful plants for house decoration so that even in the city in dry steam-heated apartments they can be used as window boxes, as plants for the centre of the dining room table and for ornamentation throughout the house.

There is nothing that adds cheer to an office like one or two of these Gardens, which can be watered either first thing on Monday when entering the office or the last thing on Saturday before the office is closed, and they will take care of themselves during the rest of the week.

As gifts for any occasion they are useful on account of their most wonderful lasting qualities, beauty and novelty.

So try some of Manda's Cactus Gardens, which are kept by all first-class florists, if not send direct to us.

SANSEVERIAS

These are the most lasting plants for house decoration. We have grand stock in three varieties, either as single plants or in fine attractive combinations.

S. Zeylandica Zebras, striped -----	2½ or 3 inch pots, \$.50 each
S. Zeylandica Zebras, striped -----	3 inch pots,	.75 each
S. Zeylandica Zebras, striped -----	4 inch pots,	1.00 each
S. Zeylandica Zebras, striped -----	4 or 5 inch pots,	1.50 each
S. Zeylandica Zebras, striped -----	5 inch pots,	2.00 each
S. Zeylandica Zebras, striped, 6 to 8 inch pots,	\$3.00 to 5.00	each

6 inch pots, extra strong -----	5.00 each
3 strong growths grown together -----	5.00 each
Specimens, all sizes, from -----	\$6.00 to 15.00 each

Also combinations and in fancy pots.

BROMELIADS OR PINE APPLE FAMILY

“The Living Vase Plants.” An extraordinary class of plants with foliage which makes the plants very lasting, and as the stems and foliage hold water, they can be used as vases to put spray flowers in. Their flowers are showy and of bizarre coloring, which, with their hardy qualities, make them most desirable plants.

Cryptanthus acaulis -----	2½ inch pots, \$.75 each
Cryptanthus acaulis, larger -----	3 inch pots,	1.00 each
Assorted varieties and sizes, varying from-----	\$ 1.50 to	7.50 each
Special Show Plants -----	10.00 to	20.00 each
Artistic and natural Combinations, with as-		
sorted plants, from -----	7.50 to	25.00 each

IVIES

One of the best green florists' plants. We grow a large quantity of this useful plant in all sizes from babies in one-inch pots to show plants in large tubs, and our collection comprises over thirty-five distinct varieties. Besides, we grow its close competitor, the Vitis rhomboidea, which please see.
